**Subject:** Cincinnati Development Opportunities

Good Afternoon Joshua,

I'm currently overwhelmed with a variety of Microsoft SQL Server, Microsoft .net, and J2EE development roles. Primary technologies required (depending on the role) are SSRS, SSIS, SSAS, C#, VB.NET, Silverlight, J2EE, Spring, and Hibernate. I also have openings for a LoadRunner performance tester, an Informatica/ETL developer, and a mobile application developer. All opportunities are in Cincinnati, and we have direct-hire/permanent placement, contract-to-full time, and project-based consulting roles available. If you know of anyone that could use some help in their job search with any of these skills, I would love to be of assistance.
